

Court Orders 26 Brooklyn Lines Returned

Continued from page 1

lines. He said the whole matter might have been prevented if a logical settlement had been made earlier, and he admitted that in some cases a double or triple fare would have to be charged. The Commissioner added: "I shall do everything in my power to work out transfer arrangements between the various companies. Hearings will commence immediately."

Corporation Counsel Burr declared that the Public Service Commission must check an increase in fares. "If it does not establish joint rates and through routes," he said, "it will be my duty to bring mandamus proceedings against it to compel such action."

The formal order returning the roads and an agreement on power and maintenance bills and other funds expended on the lines while in possession of the Brooklyn Heights Company will be presented to Judge Mayer for approval on Thursday morning.

Francis S. Bangs, of Guthrie, Bangs & Van Sinderen, represented the Brooklyn City Company at the hearing. He announced that the owners were ready to resume operation of the lines and that H. Robert Porter, an engineer, of the firm of Sander, has been retained as general manager of the lines.

In addition to Mr. Bangs and Mr. Porter, the hearing was attended by General George W. Wingate, representing the trustees; George S. Franklin, representing the War Finance Corporation, which holds \$17,000,000 in B. R. T. notes; and Robert T. Swaine, representing the B. R. T. note holders' committee.

Tells of Stockholders
Mr. Bangs declared before Judge Mayer that more than one-half the stock of the Brooklyn City Railroad Company were women. Of the 14,722 stockholders 742 are women and 137 are estates. Two-thirds of the stock is owned by women, estates, life insurance companies, charitable and educational institutions, he said.

Judge Mayer said he had inquired into the percentage of stock owned by women because he had received many letters from women who told of their distress because of the receiver's inability to pay interest or dividends on their securities.

"There is no doubt at all that these various railroad securities are very considerably held by people who are in no way connected with speculative purposes or enterprises," said Judge Mayer, "but who hold them as investments, people who are dependent on them for a living income, especially at this time when there has been such a tremendous increase in the cost of living, and especially women, widows and children dependent upon these incomes and having no other means of income or of livelihood."

Judge Mayer agreed with Mr. Bangs that more than one-half the stock of the Brooklyn City Railroad Company were women.

I looked up and saw that the glaring light under which I had been working for months had become so soft that I could look directly at it without blinking. And yet the whole office was as bright as morning sunlight.

As Thomas explained the new light I realized why my headaches were gone. He took me into our showrooms and showed me the same fixtures there, but covered with beautiful silk shades.

That night when I got home and went into the dining room, every lamp in the chandelier seemed to hit me right in the eye. I met my wife with the remark, "I'm going to have these lighting fixtures changed."

"No, you're not," said she promptly. "Not now. We've got to have these rooms repapered in the Spring anyway, and I'm not going to have them torn up twice." I explained that the lights I wanted could be put up in a few minutes. I told her about the silk and cretonne shades which could be selected to match her curtains. And when she called up the electrician and he told the pros, she ordered them.

When I came home the next evening the lights were there. "Do you know," said my wife, "I don't believe we'll have to repaper after all. This Duplexlite makes it look so much brighter and cozier—and doesn't it bring out the tones of the furniture and rugs beautifully?"

Duplexlite is the greatest advance in lighting since the invention of the Mazda lamp. It is a patented device giving a unique combination of direct and indirect lighting, with the merits of both and the faults of neither. A curved metal reflector so distributes the light that it spreads to all parts of the room in a mellow radiance, without glare and without heavy shadows in dark corners. Through a flat glass diffusing disc increased intensity is radiated below. For the first time it is possible to use the home the new Mazda C, the most efficient and economical lamp ever known.

Silk, cretonne, or parchment shades in a variety of designs and colors make Duplexlite an effective decoration for any room.

Write today for attractive free booklet giving facts about good lighting, and showing many styles of decorative shades, entitled, "Light Where You Want It."

Light
headaches
and
beautiful
homes

For a long time I had been having "four o'clock headache"—that dull nagging that creeps in behind your eyes toward the end of the day's work and sends you home nervous and cross. At first I blamed it on the heavy lunches, and cut down on crackers and milk, with no result. I cut out smoking. But still my enemy came gnawing at my temples every afternoon.

One morning I came down resolved to go to an optician. But oddly enough, that afternoon I had no headache so I put it off. Again the next day I found myself, when 5 o'clock came, still clear-headed and wondering what had happened.

Just as I started for home, Thomas, the office manager, came in and said "How do you like our new lights?"

"What new lights?" I asked. "I hadn't noticed them."

"I don't wonder you hadn't," he said. "We call them the disappearing fixtures because you hardly know where the light is coming from. Look!" and he pointed overhead.

I looked up and saw that the glaring light under which I had been working for months had become so soft that I could look directly at it without blinking. And yet the whole office was as bright as morning sunlight.

As Thomas explained the new light I realized why my headaches were gone. He took me into our showrooms and showed me the same fixtures there, but covered with beautiful silk shades.
